Nurses unite to demand universal public health

The announcements by Prime Minister Narendra Modi in his most recent address to the nation on October 11, 2020, that India is making a major step toward a very significant section of the public health infrastructure in India. The PM also made a very important announcement that the government has introduced a fund of INR 12,000 crores to incentivize and support the creation of 0.7 million hospital beds in the country within a period of 4 months. This move will be a major step towards achieving universal health coverage in India.

Nurses from the Philippines are also on the frontlines of COVID-19 response in other nations worldwide. Some of them have gotten sick some are in quarantine, some exhausted, and some have died. A nurse in London working for National Health Services (NHS) had died under quarantine.
