

Roads battle darkness as soon as it's evening during rains

In such conditions, people face huge trouble in walking and driving on roads

Kavita Singh Rathore, Bhopal Many types of problems are coming out of the capital during rainy days. One big problem in this is the non-functioning of street lights on the roads, due to which darkness prevails on the roads.

One is rain and on top of that darkness, in such conditions people are facing a lot of trouble walking on roads and driving vehicles. Accidents are happening every day at night. And at the same time chain snatchers are active. Due to which it has become difficult for women to go out, they feel unsafe, but despite this the Municipal Corporation, public representatives and administration are not serious about getting the street lights fixed. In such a situation, who will be responsible if a big accident happens. In the capital, BHEL area, Kolar, Ayodhya Bypass Road, Anna Nagar, Raisen Road, road before Anna Nagar, Security Line, Piplani 100 Quarter, Bhanpur Road, road from Bansal Hospital to JK Hospital, Ratnagiri to Bhanpur Road, Piplani B Sector to Khajuri Kalan Road, Mahatma Gandhi to Avadhपुरी, Govindपुरा Police Station to Security Line, Karond, Chunabhatti, Char Imli, Saket Nagar, Bagsewaniya to

Road before Anna Nagar

Ayodhya Bypass

Katarra Hills Road, Barrai, Bawdia Kala, some roads in Bairagarh area, Ater Road, Bogda Bridge, some roads inside Ashoka Garden, Govindपुरा area, Badi Sabzi Mandi Road and Hoshangabad Road along with more than a dozen other roads are im-

mersed in darkness at night. Here, street lights have been installed on the roads by the Municipal Corporation, but despite this, they are not lit and the surrounding areas appear in darkness. Now the question arises, do the officials of the corporation

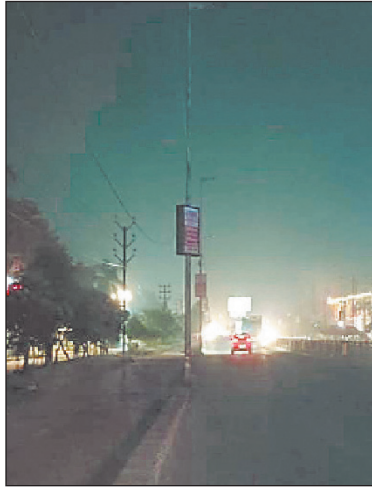

The areas where the lights of the Municipal Corporation have been installed are maintained from time to time. The lights which come under the Smart City are looked after by them. Whenever we get a complaint, we solve it and will do so in future also and those which come under the Smart City are informed by them. Apart from that, they look after the maintenance of the BHEL area. Malti Rai, Mayor

Brijmohan Khandeshwar, who lives in Transport Colony situated at Kokta Bypass, says that, due to the street lights being switched off on the roads, the localities remain dark. If you go out with children at night, you feel scared. In such a situation, even snakes and scorpions are not visible on the road. Brijmohan Khandeshwar, Transport Colony resident

Sunita, who lives in Awadhपुरी, says that there is always a danger of animals at night. Also, the mud and potholes on the road are not visible. Big vehicles hit small vehicles in the dark and go away. They are not even afraid of their vehicle registration numbers being seen. Sunita

Bairagarh Road

forget to turn on these street lights? Or are they out of order? Due to this negligence of the officials and the responsible people, accidents happen on these roads at night. The drivers are not able to see the potholes and animals sitting on the road.

After SIMI, Khandwa also became a stronghold of Jihadi organizations

Security in danger — SIMI's activities exposed in 2006

Rajendra Parashar, Khandwa After the arrest of two terrorists, Khandwa is once again in the headlines. This city has an old relationship with organizations like SIMI and IM. SIMI's activities were exposed in 2006. Some people from Khandwa have done Jihadi work across the country. This city has been a favorite of SIMI chief Salfard Nagauri. This city became famous across the country after the Khandwa jail break and the Jihadis looting several kilos of gold from Mannapuram. In the case of SIMI, a big network never ended here.

and brother at Juni Indore Line in Khandwa. According to sources, terrorist Faizan had gone to meet Abdul Raqib, arrested by Kolkata NIA, in jail six months ago.

Suicide attack on the crowd was planned

Terrorist Faizan Hanif Sheikh arrested from Khandwa was influenced by the ideology of Indian Mujahideen and Islamic State. Madhya Pradesh ATS foiled his plan by arresting him from Saluja Colony in Khandwa. Faizan was preparing to launch a lone wolf attack by going among the security forces.

More arrests possible from Khandwa

ATS is continuously questioning terrorist Faizan about who else is close to him in Khandwa apart from terrorist Raqib Qureshi who is lodged in Kolkata jail. ATS Bhopal is handling this case. However, Khandwa police has the biggest role in the rescue and arrest of Faizan.

Workshop on X-Ray Diffraction Hosted by Physics and MME Departments at MANIT Bhopal

Bhopal: MANIT Bhopal's Physics and Metallurgical and Materials Engineering (MME) departments jointly organized a highly informative workshop on X-ray Diffraction (XRD) from [Dates]. The workshop, which attracted a diverse group of participants including researchers, academicians, and students, aimed to deepen understanding and expertise in the application of XRD in material sciences. Led by distinguished experts in the field, the workshop covered foundational principles of XRD, advanced techniques, and practical demonstrations. Participants engaged in hands-on sessions utilizing state-of-the-art XRD equipment to analyze and interpret various materials' structures. Dr. C Sasikumar, coordinator of the workshop, underscored the significance of XRD in un-

Participants engaged in hands-on sessions utilizing state-of-the-art XRD equipment to analyze and interpret various materials' structures.

Dr. C Sasikumar, coordinator of the workshop, underscored the significance of XRD in un-

derstanding material properties and its role in advancing scientific research. "X-ray diffraction is indispensable for characterizing the atomic and molecular structures of materials, offering critical insights into their behavior and applications," remarked Dr.

Piyush Kumar Patel. Participants lauded the workshop for its comprehensive approach and practical learning opportunities. "The workshop not only enhanced our theoretical understanding but also equipped us with valuable skills to conduct XRD analyses independently," said S.B. Prasad, Junior Technical officer from IIT Delhi.

Encouraged by its positive reception, MANIT Bhopal looks forward to organizing similar interdisciplinary workshops to foster collaborative research and innovation.

Patients now coming from abroad for treatment in AYUSH dept of AIIMS

Bhopal: AIIMS Bhopal is offering advanced treatment options for patients suffering from ano-rectal disorders such as piles, fistula, fissures, and pilonidal sinus through Kshar Sutra therapy within its Ayush Department. Under the leadership of Prof. (Dr) Ajai Singh, Executive Director of AIIMS Bhopal, the hospital continues to prioritize the holistic health of the community by embracing an integrated health system.

from Germany was successfully treated for fistula by Kshar Sutra method. Earlier, this woman had also undergone surgery twice in Germany but she could not recover completely. After not getting cured for a long time, she came to India in search of other methods of treatment and her search ended at the AYUSH department of AIIMS Bhopal. Sharing her experience of treatment, the patient said that fistula is treated by Kshar Sutra method only in India. I express my gratitude for getting better treatment here in AIIMS Bhopal. Treatment by Kshar Sutra method does take time but it does not cause any pain as compared to other methods of treatment. After the treatment which lasted for about 5 months, now I am going back to my country after getting com-

pletely cured.

A Traditional Solution with Modern Benefits

Kshar Sutra Therapy is a time-honoured Ayurvedic technique primarily used to treat fistula-in-ano and other ano-rectal disorders. This minimally invasive procedure employs a medicated thread (Kshar Sutra), coated with a special alkaline herbal paste, which is carefully introduced into the fistula tract. The therapy works by gradually cutting, draining, and healing the fistula tract through its continuous chemical action.

Professor Ajai Singh's dedication to enhancing patient care through integrated health systems has made advanced treatments like Kshar Sutra therapy accessible to the people not only from India but abroad also, at AIIMS Bhopal, significantly improving patient outcomes and satisfaction.

AIIMS doctors save girl's life by conducting complex surgery

Medical Science — Football-sized tumor was taken out

Bhopal: A tumor had come out of the head of a 13-year-old girl and had become the size of a football; AIIMS doctors saved her life by conducting complex surgery. This surgery was done on July 4.

This 13-year-old girl, a resident of Ashoknagar, was brought by her family in critical condition; she was on a ventilator. MRI of her brain revealed that there was a large tumor in the brain and it had come out tearing the head. An inter-departmental meeting was held by Prof. Amit Agarwal, Dr. Aadesh Srivastava, Dr. Sumit Raj and Dr. Pradeep Chouksey of the Department of Neurosurgery and it was decided to perform emergency surgery to save the child. The

operation of this case was done in the Neurosurgery OT of AIIMS Bhopal on July 4. In this case, the surgery was done by Dr. Sumit Raj with the help of Dr. Jitendra and Dr. Abhishek. This surgery took about 8 hours. The tumor was extremely large, and was

causing damage to the skull, which was removed. The head was covered with a titanium plate. The skin was then covered with the help of Dr. Gaurav Chaturvedi and Vikas' plastic surgery team. The anesthesia team played an important role in carrying out this procedure, which was carried out by Dr. Ashutosh and Milind.

Girl regains consciousness very next day

The patient regained consciousness the very next day and her condition is fine in the postoperative period. Doctors say that till date only a few cases of round cell tumor of the calvarium have been reported in the world. AIIMS Executive Director Prof. Dr. Ajay Singh has congratulated the entire team for successfully performing the surgery of the girl.
