Cong slams Modi govt over fall of Indian rupee against US dollar

New Delhi (UNI)

The Congress on Friday hit out at the Narendra Modi government over the falling value of the Indian rupee against the US dollar, alleging that the Indian currency has witnessed 50 percent fall under the BJP government. The party also flagged its grave concern over the Indian currency almost touching the 87 mark against the dollar.

Addressing a press conference at the AICC headquarters here, Congress spokesperson Supriya Shrinete said, "Looks like Prime Minister Narendra Modi has resolved to make the rupee hit the century against the dollar."

She asked the government whether it realised how much impact the falling rupee will have on the common people as imports will be expensive which will lead to inflation and price rise of essential commodities.

The Congress spokesperson said that despite the RBI pumping in 80 billion dollars since September 2024 to arrest the fall, nothing had happened to redeem the value of the rupee, which is in a free fall.

Shrinete alleged that the foreign exchange reserves in the country right now were lowest in the last ten months at 625 billion dollars against the high of 704 billion dollars in September 2024.

Geo-Tagging Borewells, now mandatory in MP

Chronicle Reporter, Bhopal

In a decisive move to curb the recurring tragedies of children falling into open borewells, the Madhya Pradesh government has introduced stricter regulations. Despite numerous warnings, such incidents have continued to claim innocent lives, leaving families shattered and the administration scrambling to mount rescue operations. To address this alarming issue, the government has implemented the Madhya Pradesh Prevention and Safety Rules-2024, ensuring enhanced safety and accountability in borewell construction.

Under the new rules, geo-tagging of borewells has been made mandatory, and agencies involved in borewell digging are now required to obtain licenses from the Executive Engineer (EE) of the Public Health Engineering Department. This reform is aimed at bringing transparency and ensuring every borewell

is tracked from the moment it is drilled.

Safety First: A Proactive Approach. In addition to geo-tagging, the rules mandate that agencies must in-

stall proper safety measures during and after borewell construction. For example:

Signboards with complete information: The drilling site must have a visible signboard displaying the contact details of the drilling agency and the landowner.

Physical barriers: The area around the drilling site must be fenced with barbed wire or any suitable barrier to prevent unauthorized access, especially by children.

Encouraging Citizen Participation

To ensure compliance, the government has introduced an innovative approach: rewarding those who report violations. If any individual spots a borewell that does not follow the prescribed safety measures and reports it to the authorities, they will be eligible for a reward. This initiative not only empowers citizens but also creates a collective sense of responsibility in preventing accidents.
