Ideal home design based on zodiac signs

Whether you're a strong believer in astrology or you take your horoscope with a grain of salt, it's difficult to deny that the zodiac signs typically match our personalities pretty well. Fire, earth, air, or water, each sign craves different colors, textures, and styles to be able to flourish at home.

According to astrologers, looking to your zodiac personalities can give clues to preferred tones, finishes, and furnishings. To figure out which rooms to focus on and exactly how to decorate Erik Tinker, founder of Tinker Development, describes the ideal home design for each zodiac sign below.
