

There Are (At Least) 9 Types of Astrology—Which One's Right for You?

Since the dawn of civilization, people have been using different types of astrology for everything from timing when to harvest their crops to choosing dates for their wedding to finding a lost pet. Much more than just a personality test, astrology isn't a one-size-fits-all situation. Choosing an astrologer or type of reading can resemble the process of comparing different kinds of specialty doctors to cure your very particular medical ailment. So, what type of astrology is right for you? Here's an easy-to-digest breakdown of six major types to get you started.

Vedic Astrology
Reading Type: Varies in length (sessions usually 45-90 minutes), plenty of practitioner availability
Best For: Those who are new to astrology and searching for something personality-based and easy to digest

Western Astrology
Reading Type: Varies in length (sessions usually 45-90 minutes), plenty of practitioner availability
Best For: Those who are new to astrology and searching for something personality-based and easy to digest

2. "Traditional" Western Astrology (Hellenistic, Medieval etc.)

Reading Type: Varies in length (sessions usually 45-90 minutes), many practitioners are beginning to specialize in this type of astrology so there's a lot to choose from!

Best For: Those who are new to astrology looking to evaluate life circumstances and plan for future events

3. Evolutionary Astrology
Reading Type: Varies in length (sessions usually 45-90 minutes), more of a specialty so there may be less availability
Best For: Soul-searching types who have some experience with astrology and want a deep, unique

perspective
Evolutionary Astrology was first practiced in the 1970s and can be described as a combination of metaphysics and humanistic psychology.

4. Vedic Astrology
Reading Type: Lengthy (sessions can be 3 hours+), usually very expensive
Best For: Those with some astrological experience who are serious about holistically integrating astrology into their lives

Vedic Astrology, also known as Jyotish, is rooted in the Vedas, the oldest texts written in Sanskrit, which inform Hindu religion and philosophy. Unlike other types of astrology, Jyotish has been practiced uninterrupted for thousands of years in India and beyond. This continuous application allows for a deep rigor and precision in a Vedic reading that you don't get with other types of astrology.

5. Horary Astrology
Reading Type: Quick (written reports or a 15-20 minute session typically), inexpensive
Best For: Very specific questions within a closed timeframe

When you're in a pinch for an answer, Horary Astrology is the way to go. A reading is like doing a quick three-card tarot pull. The idea is that you must come to an

astrologer with a very specific question (ie, "Where are my keys?" or "When will I hear back about my job interview?") that can't be answered any other way. The astrologer then draws up the chart of the moment that your question was asked to delineate the answer.

6. Locational Astrology
Reading Type: Done as a report or a one-on-one reading; astrologers usually "specialize" in this modality so it can be more expensive
Best For: Those looking to move or see how moving might change their life

7. Electional Astrology
Reading Type: Easy delivery (report or quick one-on-one session), but usually expensive
Best For: Those looking to find the best dates for a wedding, business launch or other important event

8. Relationship Astrology
Reading Type: Lengthy, often quite expensive
Best For: Committed couples looking to better understand each other

The most common questions astrologers get are about love and money. Though you can tell a lot about your partner from your individual chart, getting a joint

reading that describes your synastry (another word for astrological compatibility) can enhance your relationship on a cosmic level. Ethical astrologers won't do this type of reading unless both parties consent to it, so make sure your partner is really down before you schedule the session!

9. Medical Astrology
Reading Type: Lengthy, usually an ongoing relationship with the astrologer, expensive
Best For: Those who want to understand medical conditions from a perspective outside of Western medicine

So you know that Pisces are spacey dreamers but were you aware that Pisces rules the feet? Since the earliest practice of astrology, the signs and planets have all had body correspondences. Through the Medieval period, medical astrology was even included in a doctor's professional training. Sometimes a transit makes you think certain things but often, it also makes you feel a certain way in your body. To this day, medical astrologers—like Claire Gallagher, whose recent book *Body Astrology* breaks down this method so it's digestible even for beginners—chart how the stars affect these ebbs and flows.

Natal Astrology

A natal chart reading is a "classic" birth chart session meant to get you in touch with the shape of your life as described by the position of the planets and luminaries in the sky at the moment and location of your birth. You can get a natal reading in many styles including (but not limited to) the following:

1. Modern (or, Psychological) Astrology

Reading Type: Varies in length (sessions usually 45-90 minutes), plenty of practitioner availability
Best For: Those who are new to astrology and searching for something personality-based and easy

The Fate Line Palmistry And Its Role In Palm Reading

The fate line of palmistry is usually considered a life map, which is said to show career, wealth, and primary life event patterns. Some possess a deep and unbroken fate line, which indicates that one will have a strong and specific direction, whereas others can have a weak or broken one, suggesting change and fluctuations. Its beginning, duration, and intersection with other lines are indicative of the problems and possibilities that mark a person's life. While some view it as a pointer to fate, others view it as a mirror of what happens and the decisions one makes throughout one's life.

Instead of a fixed prophecy of the future, the fate line has been considered a living impression upon the path of life. It can be altered as the person grows up based on choices, character, and conditions. A well-marked fate line is not necessarily an indication of success, nor a feeble one an indication of failure—it just indicates how it works out. Most people feel that determination, perseverance, and flexibility are more about how one gets through life than any palm line, supporting the theory that destiny may direct the stage, but human effort creates performance. In other instances, the fate line ends at the headline, which is believed to show a life directed by the mind and personal choice and not by outside influences.

What Is Fate Line?

The fate line in palm reading, or the line of destiny, is one of the lines in palmistry that are very significant. It is a main line that is used vertically on the palm, beginning at the base and moving towards the fingers. It is said to indicate the career life of an individual, life path, and significant life changes. The depth, presence, and shape of the fate line are reported to show the extent of stability, achievement, and external influences that rule a person's life. A few individuals possess a strong and unbroken fate line in the male hand or female hand, with a sharp and consistent trend, while others have a faint or broken fate line, indicating continuous changes or problems. In certain instances, the no-fate line in the palm means that the individual more often uses free will than destiny. While different interpretations are made, the fate line itself is usually an indication of personal choice and external forces affecting one's destiny.

Where Is The Fate Line Located?

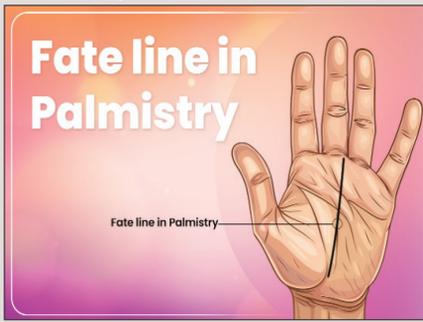

In palmistry of fate line, this line typically begins at the bottom of the palm close to the wrist and is slanted towards the middle finger. Its presence, strength, and patterns vary for varying individuals. The fate line of the male hand can be more powerful or prominent, whereas no fate line on palm is found in some, suggesting a life governed by free will instead of fate. In some individuals, the fate line ends at the headline, which means that reason and decisions play an influential role in their life path.

Various Types Of Fate Lines In Palmistry

The fate line in palmistry is the most prominent line on the palm that provides information about a person's career, fate, and course of life. The line that rises from the rim of the palm to the fingers may be of varying depths, lengths, and types. All these factors point to a person's professional stability, achievement, and changes in life. Here are the various types of hand reading fate line meanings and their descriptions in fate line in palm reading.

1. Deep And Strong Fate Line – Stability And Determination

A deep and clear fate line in palmistry means a systematic and stabilized professional life. They have a goal-oriented life, one-pointedness towards goals, and high ambitions. They would face fewer setbacks and have continuity in their profession. People with this are mainly engaged in one line of profession and are highly disciplined.

2. Faint And Narrow Fate Line – Unclear Purposes And Indecisiveness

A thin or feeble fate line on palmistry indicates indecision in life and career options. They are generally unclear about their passion, keep switching jobs, or are uncertain about their decisions. Although they may not have a clear-cut career, they excel at jobs that provide flexibility and diversity. Their life path is determined more by personal choices rather than fate.

3. Broken Fate Line – Disruptions And Major Life Changes

Disrupted or gapped hand reading fate line represents instability, obstacles, or a series of changes in career and life. Such gaps reflect the times of adversity, job loss, or untimely changes in professional and personal life. But, these people have become strong and adaptable and have learned to reinvent their careers multiple times.

4. Double Fate Line – Various Careers Or Deep Support System

Certain people possess two fate lines in palmistry, which lie parallel to one another. This unique mark indicates that the individual will likely lead more than a single career, duty, or source of income. It could also indicate exceptional external assistance from parents, advisors, or life partners in supporting their success. Such a person is typically good at handling multiple tasks and able to perform various roles at a time.

5. Wavy Fate Line – Unpredictability And Unconventional Career Life

The wavy fate line in palmistry suggests an unpredictable and unstable career life. People who have this kind of fate line usually have a mixed career history, trying different job profiles, sectors, or business enterprises before establishing a settled career. Even though they never settle down, they tend to be versatile, creative, and willing to try out different options.

6. Short Fate Line – Limited Career Progress Or Delayed Success

A short fate line in palmistry, not stretched very far up the palm, indicates delayed success in life. Such people might find delays in career advancement, begin their professional career late, or strive for self-improvement at the cost of material well-being. However, they will achieve success in the latter part of their lives through hard work and life experience.

7. Forked Fate Line – Multiple Opportunities And Career Transitions

A Y-shaped fate line splits into two at the head, representing double career opportunities or significant career shifts in life. These people tend to try their hand at various professions, possess several hobbies, or achieve career breakthroughs that bring them unexpected success. It depicts flexibility, versatility, and capacity to handle multiple opportunities effectively.

8. No Fate Line On Palm – Self-Made And Independent Thinkers

A couple of individuals do not have a fate line on their palm, indicating that they create their own fate instead of being on a predetermined path. They trust free will, hard work, and resilience more than destiny or external influences in becoming successful.

Fate Line Ending At Different Points

Fate line in hand reading also ends at different positions on the hand, and each position indicates a different meaning as far as career development, success, and life path are concerned. The hand-reading fate line position gives information about the role played by external situations, personal exertions, and fate. Here are some of the various endings of the fate line and their meanings.

1. Fate Line Terminating At The Head Line

If the fate line ends on the headline, then it indicates that a person's career and life are governed by their intellectual choice and thinking. These people typically experience sudden changes in their professions during middle age, frequently due to personal decisions, overthinking, or changing their minds. Study and intellectuality dominate their profession.

2. Fate Line Ending On The Heart Line

If the fate line at palm reading ends on the heart line, it indicates that their career advancement is based on emotional aspects, relationships, or personal sentiments. They generally select their careers according to their hobbies or love life and not for materialism. In some cases, their personal life may help them develop their career or hinder it.

3. Fate Line Capping On The Mount Of Saturn

A hand-reading fate line that extends to the Mount of Saturn (under the middle finger) is a good sign of professional success and long-term stability. Individuals with this fate line possess a well-organized life, progressing steadily toward their objectives. They are diligent disciplined, and are bound to attain professional success or dominance in their field.

4. Fate Line Ending At The Mount Of Jupiter

When the fate line of palmistry intersects the Mount of Jupiter (under the index finger), it indicates excellent leadership qualities, ambition, and success orientation. They tend to be highly motivated, confident, and adept at achieving the topmost rung in their professional career. They excel in dominating positions like management, politics, or business.

5. Fate Line Ending At The Mount Of Sun

In palmistry, the fate line breaking off at the Mount of Sun (beneath the ring finger) reflects an individual who will reach celebrity status, celebrity, or success in any kind of artwork. Art professionals, actors and actresses, poets and authors, and individuals for whom recognition publicly plays an instrumental role possess such a tendency. They are given abilities distinct from other individuals.

6. Fate Line Ending On The Mount Of Mercury

When the hand reading fate line ends on the Mount of Mercury (lower than the little finger), it indicates sharp business acumen, thriving business, and excellent communication ability. They are most likely to be good in trade, business, advertising, or any profession involving convincing and negotiating.

7. Fate Line Ending On The Mount Of Moon

A curved palmistry fate line towards the Mount of Moon (outer palm close to the little finger) indicates that the individual's profession is guided by intuition, creativity, and social interaction. They will probably work in travel, spirituality, psychology, or occupations involving good people skills. They can also be guided by chance and outside events instead of a set career path.

Weekly Horoscope: Jan. 18th to 24th Jan. 2026

2026 is the first year in some time to begin with no planets retrograde. Despite this, I know I'm not alone in feeling like things have been slow to start. But is that a bad thing? The astrological explanation for this is that we're at the beginning of many new cycles, and a lot has to end before other things can begin—cue Semionovic's "Closing Time" for the Millennials and Gen Xers. This sky poetry is made obvious this week when Capricorn season concludes with a new moon in Capricorn on the 18th, taking place in the final degrees of the sign of the sea goat.

Aries

The new moon in Capricorn on the 18th is a chance to pause and consider your intentions when it comes to career and public image. If something you want has been eluding you, perhaps it's because you haven't been focusing your energy in that direction. Aquarius season begins on the 19th, and for the next month plus, opportunities for networking and expanding your reach will come up more often than usual.

Libra

This week's new moon in Capricorn (on the 18th) brings a chance to set intentions around home and family. The last few weeks have shifted your priorities in your private life, and this week feels like you're finally starting a new chapter. Whether you're moving apartments or saying goodbye to your childhood home, it's a bittersweet start. Then, on the 19th, Aquarius season begins pulling your focus to romance, creativity and joy for the next month.

Taurus

The new moon in Capricorn on the 18th feels like the first day of school. Whether you're in a grad program, at a professional development conference or downloading Duolingo again, let the learning journey commence! Your focus isn't just on knowledge though, it's also on building community and seeking out mentors. Aquarius season starts on the 19th, bringing leadership opportunities and career pivots if you want them.

Scorpio

This week's new moon in Capricorn on the 18th is a chance to implement a routine, schedule or communication method that you've been considering for the last few weeks. Once Aquarius season begins on the 19th, you'll be more of a homebody than usual and very focused on close friends and family. Find your hibernation flow so it can feel more like a retreat and less like confinement.

Gemini

The new moon in Capricorn on the 18th finds you in a state of resolution or reconciliation. Maybe you're apologizing to your partner. Maybe you're heading back to therapy. Maybe you're setting up an appointment with your accountant. You've had to do a lot of negotiating over the last month and you're finally seeing the light at the end of the tunnel. The start of Aquarius season on the 19th brings an opportunity to get out of the muck and into your next adventure.

Sagittarius

The new moon in Capricorn on the 18th brings one more reset for your money mindset and livelihood. The last few weeks have shaken up your financial life and though you (probably) didn't win the lottery, you're feeling more grateful than usual for the resources you have. Then on the 19th, Aquarius season shifts your focus to cultivating friendships and routines. How can you participate more on the local level?

Cancer

This week's new moon in Capricorn on the 18th brings one more fresh start for your partnerships and agreements. You've signed a lot of contracts and gone on many "first dates" this month. Now you're moving out of the honeymoon phase where the work really begins. With the start of Aquarius season on the 19th, so begins a season of making compromises and adjustments.

Capricorn

New moon, new you! The new moon in Capricorn on the 18th brings yet another fresh start for your image, health and identity. Over the last few weeks, you've been going through a bit of a style crisis, but this week, you're finally feeling confident in how you show up. Sure, it's different than how you were showing up a few years ago, but the change is invigorating. Aquarius season begins on the 19th, shifting your focus to money matters.

Leo

The new moon in Capricorn on the 18th might not be your first day at a new job, but it sure feels like it. You have a new challenge on your hands and a new set of rules to learn. You might be getting used to a new person or pet in your daily life too. Or maybe you're adjusting to a new medication. As Aquarius season begins on the 19th, consider who would make a valuable partner in crime for this quest.

Aquarius

How are you feeling, Aquarius? The new moon in Capricorn on the 18th has you feeling isolated, meditative and distant. Maybe the past few weeks have brought some much-needed rest, but maybe you're feeling angry and like it's time to end this period of hibernation. Your season begins on the 19th, so get ready to come out of the darkness and back into the light!

Virgo

The new moon in Capricorn on the 18th brings one more fresh start for your creative and romantic life. The experiments of the last month are coming to an end as you start to get serious about something you're in for the long haul. Then on the 19th, Aquarius season begins and tasks you with building more discipline and healthier habits.

Pisces

The new moon in Capricorn on the 18th initiates a new era for your friendships, community and worldly visions. Many dreams and schemes have taken shape for you over the past few weeks, and now's the time to commit and get started.
